## 2023 California Processing Tomato Report

Pacific Region • 650 Capitol Mall, Suite 6-100. Sacramento, CA $95814 \cdot(916) 738-6600 \cdot(855)$ 270-2722 Fax • www.nass.usda.gov/ca
Released: August 30, 2023 - 12:00 p.m. PDT

## 2023 PROCESSING TOMATO PRODUCTION

Contracted production for California processing tomatoes is forecast at 12.9 million tons, averaging 50.8 tons per acre. The current production forecast is $23 \%$ above last year's contracted production of 10.5 million tons, and $2 \%$ above the May forecast. The projected harvested acreage of tomatoes grown under contract is 254,000 acres, up $13 \%$ from 2022.

Unseasonably wet weather through winter and spring delayed planting by weeks, but with recordhigh prices and ample water, contracted acreage increased significantly. Harvest began with a slow start in mid-July, a couple weeks behind average,
and is expected to continue well through October if the weather stays dry. Now entering peak harvest, canneries are busy managing the logistics of consistently delivering ripe tomatoes to the plant.

The Processing Tomato Advisory Board published shipments through August 26, 2023, showing a $16 \%$ decrease compared to the end of August 2022. However, due to the late crop, shipments are expected to catch up and exceed the past 5 years.

This processing tomato estimate is funded by the California League of Food Producers.

## California's Harvested Processing Tomatoes

Weekly Cumulative Totals for 2018 through 2023

ACREAGE AND PRODUCTION (CONTRACT AND TOTAL) - CALIFORNIA

| Year | Total crop |  |  |  | Contract only |  |  |  |  |
