

Dehydrated Vegetable Powder

Straight from the Source: Reliable Supply and Advanced Traceability for Your Ingredients

We want to be your supplier of choice.

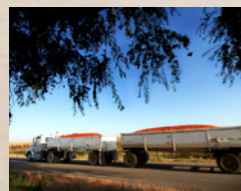

When looking for your dehydrated fruit and vegetable powder ingredients, why not go straight to the source to benefit from quick and efficient deliveries, advanced traceability, and, most importantly, a consistent supply of high-quality products.

At Morning Star, we deliver superior customer value through our dedication to providing a reliable supply of consistent quality product, value-added customer service, and sustainable pricing from innovation and scale. With three tomato processing facilities throughout California, we are the most geographically diverse processor in the industry - increasing our reliability of supply.

We're more than a tomato ingredient supplier.

We go beyond being a mere supplier of tomato ingredients. We strive to revolutionize the tomato and food industry through our advanced techniques, ethical practices, resourcefulness, and vertically integrated business model.

Efficient supply chain solutions to boost your bottom line.

As your comprehensive supply chain partner, we deliver exceptional value through our streamlined direct-from-the-source approach that will minimize delays and overhead expenses. This approach translates to a more efficient operation, allowing you to reduce your costs and achieve a competitive product price sure to boost your bottom line.

Tomato

Discover our innovative and sustainable processing capabilities.

Morning Star has advanced processing capabilities, including mechanical and solar drying, milling, and post-drying processing. We prioritize strict granular traceability on every shipment and are committed to sustainable practices, such as utilizing recycled heat energy and minimizing our carbon footprint.

- Mechanical and solar drying.
- 5-Log reduction through drying system.
- Triple pass natural gas fired drum dryer.
- Milling to size, peel and seed separation, and post drying processing available.

Full traceability from field to shipment.

R&D development.

At Morning Star, our state-of-the-art processing capabilities and established industry relationships enable us to partner with our buyers to create custom blends that cater to your specific needs.

Responsible production for a sustainable future.

Decreased fuel expenses and carbon footprint by incorporating the drying process into the factory production line.

Approximately half of the dryer's motor is powered by the factory's steam turbines.

Recycled heat energy from the factory processing line generates nearly 25% of the dryer's heat.

Products you can rely on.
